PWA STANDING SURVEYED BY REG. DIRECTOR

Twelve Million Dollars Worth Of PWA Work Now Under Construction

Within two and one-half months after President Roosevelt signed the 1938 Appropriations Act, the Federal Public Works Administration has actually started work on nearly twelve million dollars worth of new heavy construction in the State of California alone, according to Regional Director Kenneth A. Godwin, who states that the total cost of the 39 PWA projects already being constructed in this state is \$11,958,566. Of this amount, PWA has allotted and made available in cash \$5,927,671 in outright grants and loans.

The first project on which dirt started to fly under the current program was the new city hall and jail in San Diego. Work was started on this \$335,000 enterprise on August 1, exactly forty days after the 1938 act became law. Other San Diego projects include a tubercular unit at the county hospital to cost \$146,000 and school additions costing \$76,860.

The largest project to be among the first to get under way is the Los Angeles street improvement program, which will cost a total of \$4,923,000. Uncle Sam is supplying \$2,215,350 of this amount.

Los Angeles has more than \$7,000,000 worth of new PWA construction under way today. This includes a fire department improvement, which will cost \$1,099,000, of which the Federal government is furnishing \$899,550. Harbor improvements, now being made at Wilmington, will cost \$115,000 PWA having granted \$51,750 toward this.

New PWA activity in Alameda County includes the building of a \$732,000 bridge across the United States Tidal Canal at High Street between Oakland and Alameda, and new Oakland sanitary sewers to cost \$315,402. Work has also been started on Albany's new high school, a public works project which will cost \$63,000.

ANNOUNCE AWARD OF PAN AMERICAN JOBS

Award of the first contracts for construction of the proposed \$600,000 Pan American Airways base on Yerba Buena Shoals were announced yesterday.

To Duncanson Harrelson Company went the contract for construction of three fueling docks, a ramp and one passenger landing. J. H. Fitzmaurice, Oakland, was awarded the contract for paving work, including aprons and other work. The Pan American Airways System plans to construct \$600,000 worth of improvements on the man-made island, and will start operations toward the end of the year.

WAY CLEAR FOR RELOCATING OF SHASTA TRACK

S. P., Department of Interior
Agree on Permanent
Track Project

The way is clear for the Bureau of Reclamation to relocate telegraph wires and 36.4 miles of main line railroad between Redding and Delta following execution this week of a contract between the Department of Interior and the Southern Pacific Company.

Completion of this contract is an important step in the advancement of the construction program of the Central Valley project of the Bureau. It is necessary to relocate the Southern Pacific main line tracks because at present this line, following the Sacramento River Canyon, runs directly through the Shasta Dam site and the area which will be flooded by the Shasta Reservoir. The new line will be taken around the dam and reservoir on the east-ern side.

Two Year Job

It is anticipated that approximately two years will be required to finish the new section of the Southern Pacific tracks. In the meantime, certain work will proceed on the construction of Shasta Dam as the result of the construction of a diversion tunnel at the dam site which will permit the trains to by-pass the area where work will be in progress. The diversion tunnel now is under construction. The contract has been awarded for the construction of Shasta Dam, although orders to proceed under it have not as yet been given. It is expected that the contractor will be told to go ahead in the near future.

Under the contract with the Southern Pacific Company, which was signed also by the Central Pacific Railway Company, holder of the legal title to the right of way, and by the Western Union Company, which has its poles and telegraph lines along the Southern Pacific right of way in the reservoir area, plans and specifications for building a relocated line will be passed upon by both the Chief Engineer of the Bureau of Reclamation and the Chief Engineer of the Southern Pacific Company.

New Line

The contract requires the Bureau of Reclamation to do or have done the necessary grading for the new line. It requires the Southern Pacific Company to lay the ties and rails and put in the electrical signal and block system at cost plus 10 per cent, payment to be made by the United States for work actually done.

The contract also requires the Bureau of Reclamation to construct the Pit River bridge, one of the principal engineering features of the new line. Title to this bridge will remain in the United States,

BLDG. MATERIAL COSTS OF BOND JOBS SURVEYED

PWA Bonds Committee An-
nounces Material Dealers
Will Gain by Passage

Passage of the first seven propositions on the ballot of the September 27 special election, the \$13,178,000 PWA bonds issues would come as a boon to San Francisco's building materials industry, a survey of the building materials figures reveals, according to the San Francisco Recovery Bonds Committee.

The projects in the issue are:

Number 1, Sewer Bonds, \$4,200,000; Number 2, Courts Building, \$3,828,000; Number 3, Yacht Harbor, \$700,000; Number 4, Schools, 12,800,000; Number 5, Welfare Building, \$225,000; Number 6, Playgrounds, \$900,000 and Number 7, Livestock Pavilion, \$525,000.

Cost of Materials

But it is when these figures are broken down and the estimated cost of materials revealed that it is shown that the seven propositions deserve the unqualified support of the building materials industry on a sound business basis, the Committee states.

For example the estimated total amount of concrete necessary for the projects is estimated conservatively at \$1,531,369. The estimation for structural and reinforcing steel

although the railroad company will be given a permanent easement for its right of way across the bridge.

The relocated line will be single tracked, although it is required that the Bureau of Reclamation construct the foundations of certain structures in such a manner that double tracking may later be accomplished. A centralized traffic control system will be installed for control of traffic over this section.

Shasta Reservoir

The railroad is granted the right to use water from the Shasta Reservoir for railroad purposes.

All track steel, including rails, fastener plates, signal controls, etc., will be furnished by the Government to the Southern Pacific for laying and installing in the roadbed.

At the conclusion of the work of relocating the railroad, the Southern Pacific Company has 60 days in which to use the track on a trial basis. After acceptance of the new line, the company has a right to demand of the Government within a period of five years payment of not to exceed \$350,000 for unusual maintenance cost actually incurred resulting from slippage, settlement, or like troubles along the right of way.

The railroad is to be paid for engineering studies in the preparation and checking of detailed plans and specifications for the work.

FOUR STATE ROAD PROJECTS AWARDED

SACRAMENTO, September 7—Director Earl Lee Kelly of the State Department of Public Works today awarded contracts aggregating \$151,314 for bridge and highway construction in Contra Costa, Humboldt, Lake and Placer Counties.

Contracts were awarded as follows: S. H. Van Gelder, at \$3742, for repair a bridge in Contra Costa County; Piazza and Huntley, at \$46,491, for 1.1 miles of grading and surfacing in Placer County; J. L. Connor and Sons, at \$69,456, for 2.1 miles of grading and surfacing a bridge in Humboldt County.

is \$1,289,957. Iron, bronze and sheet metal will run \$227,000.

Lumber and millwork costs will be \$821,000. Acoustical work \$33,000. Granite, marble and limestone will total \$569,000 with all estimates for those materials not yet completed.

Estimated Costs

Brick and terra cotta will cost \$298,511. Rock and fill, \$302,000. Heating and ventilating will run \$394,000 with the elevator costs estimated at \$172,000. Floor covering, and these figures are incomplete, is estimated at \$79,000. Furniture, also incomplete, at \$307,000. Hardware will run \$64,000 and plumbing \$141,840.

Painting will cost \$99,570 with plastering and lathing \$123,000. Glass and glazing is estimated at \$120,000; roofing at \$61,000 with figures incomplete. Electrical equipment will cost \$243,340. Machinery and piping for the sewer project alone will cost \$500,000. Window shades will run \$10,000, asphalt \$32,041, stage equipment \$13,700 and black boards \$9,000.

Such projects, coming as they do after a period of recession which hit all business will greatly stimulate business for material firms as well as contractors, the Committee contends.

It is also well to point out that forty-five per cent of the total will be paid for in an outright grant by the Federal Government. All projects have already been approved by Kenneth C. Godwin, regional PWA director. Not one of the bonds on any issue may be sold until the government or one of its agencies has paid its share of the cost. This is provided for in a resolution passed on August 15 by the Board of Supervisors.

Labor, too, will greatly benefit by the propositions. Approximately fifty per cent of the total will go for labor costs at the prevailing wage rate. With all projects needing public improvement and with business not yet out of the woods it is to be hoped business men will give the measure their staunch support, according to the Committee.

Campbell, Piazza & Huntley, Garcia Low Bidders on Three State Highway Projects

SACRAMENTO, Sept. 14.—Low bids aggregating approximately \$109,000 were submitted to the State Division of Highways here today on three construction projects located in Sacramento, San Benito and Siskiyou counties.

Low bidder on the day's largest job was Campbell Construction Company, 800 R street, Sacramento, with a proposal of \$77,011 for constructing an undergrade crossing under the Southern Pacific tracks about four miles east of Ben All Station in Sacramento county.

Azevedo Construction Co., Sacramento, at \$82,466 was second low bidder on the underpass project, which also includes about two-tenths of a mile of grading and paving with Portland cement concrete.

Complete total bids on the underpass were:

Campbell Const. Co.....	\$77,011
Azevedo Const. Co.....	82,466
J. R. Reeves, Sacramento....	83,593
Holderer Const. Co., Sacramento	84,900

A contract for slope protection work in San Benito county drew proposals from nine contractors, with Piazza & Huntley, 195 North Sixth street, San Jose, low at \$17,640.

Second low bidder was Lee J. Immel of Berkeley, at \$18,304. The contract calls for construction of slope protection on approximately eight-tenths of a mile between Paines and Tres Pinos.

Total bids on the slope protection job were as follows:

Piazza & Huntley.....	\$17,640
Lee J. Immel.....	18,304
Independent Const. Co. Ltd. Oakland	18,600
N. M. Ball Sons, Berkeley..	18,793
E. T. Lesure, Oakland.....	19,110
L. C. Seidel, Oakland.....	20,160
Granite Const. Co., Watsonville	22,737
F. Kans, Stockton.....	22,868
Valley Const. Co., San Jose	26,640
Garcia Construction Co., P. O. Box 65, Irvington, was low bidder at \$14,356 for placing roadmix surfacing, penetration oil treatment and seal coat on approximate-	

BIDS SEPT. 23 FOR BRENTWOOD SCHOOL PROJECT

15-Classroom Structure Out for Proposals; Plans Available

Bids for construction of a school at Brentwood, Contra Costa county, have been invited by the Brentwood-Deer Valley School District, it was announced this week.

Proposals on the contract will be received by the district until September 23.

The contract calls for construction of a one-story frame and stucco school building and demolition of existing structures. The new building will contain 15 classrooms.

Funds Allotted

A PWA grant of \$45,000 recently was allotted the district on the basis of an estimated cost of \$100,000 for construction of a new school building and repairs and alterations to an existing building to bring it into conformity with current standards for earthquake safety.

The application for PWA funds included necessary equipment and improvements to school grounds.

Plans for the Brentwood school job were prepared by Architect Frederick H. Reimers of San Francisco.

Contractors desiring to figure the job may procure plans and specifications from the Architect's office upon deposit of \$20.00, returnable.

STEEL INSTITUTE TO MEET OCTOBER 11-14

The Sixteenth Annual Convention of the American Institute of Steel Construction, Inc., 200 Madison Avenue, New York City, will be held at the French Lick Springs Hotel, French Lick, Indiana, October 11, 12, 13 and 14, it is announced.

Engineers from all parts of the United States will convene next year at the 1939 California World's Fair on Treasure Island, with July 13 set as Engineering Day at the Exposition.

DEED FOR PLANE BASE REQUESTED

Establishment of a Coast Guard seaplane base at San Francisco Municipal Airport was virtually assured this week when Rear Admiral R. R. Waesche, commandant, requested that Edward G. Cahill, Manager of the Public Utilities Commission, prepare deeds transferring necessary airport lands to the Federal agency.

About twenty acres of land are involved in the transfer. The Government will assume half the \$275,000 cost of dredging a runway, pay for maintenance, and expend about \$300,000 on equipment and buildings, it is reported.

Shasta Memorial Hall Bids Oct. 5

Another Shasta county building project this week joined those already out for bids as the board of supervisors, meeting at Redding, authorized advertisement for proposals on the contract for construction of the \$70,000 county memorial hall.

Bids on the project will be opened October 5, the board announced.

Construction of the memorial hall, to be built in Redding, will be financed by a loan and grant in the amount of \$72,000, recently allotted by PWA.

Plans and specifications have been prepared by Architects Masten & Hurd of San Francisco.

ly five and six-tenths miles in Siskiyou county.

Macco Construction Co. Bids \$593,042 on Funston Avenue Approach to G. G. Bridge

SACRAMENTO, September 21.—Under-bidding the closest competing firm by more than \$50,000, the Macco Construction company, Clearwater, at \$593,042, today submitted the low bid to the State Division of Highways for construction of the "Funston Avenue Approach" to the Golden Gate Bridge in San Francisco.

Macco Construction company, builders of the Waldo Approach to the Golden Gate span, offered the lowest of twelve bids submitted to the Division of Highways today.

MacDonald & Kahn Co., Ltd., at \$643,781, submitted the second lowest proposal, followed by Heafey-Moore Company and Fredrickson & Watson, bidding jointly, at \$645-810.70.

Total Bids

Bids ranged from the low proposal of \$593,042 to \$824,124.20.

Tunnel and Grading

The job involves approximately 2.1 miles of grading and 1300 feet of reinforced concrete tunnel construction.

The "Funston Avenue Approach" will run from Lake street through the Presidio to the Golden Gate Bridge and will form part of an arterial which will carry traffic from the Golden Gate Bridge to Sloat boulevard.

Motorists will drive along the approach for which bids were opened today on to Funston avenue and thence to Nineteenth avenue via a road across Golden Gate Park.

Nineteenth Avenue

The Nineteenth avenue project is now under construction by the City of San Francisco, being financed with State gas tax funds. The improved avenue will run from Sloat boulevard to Lincoln way, connecting at that point with

GERWICK LOW ON L. A. HARBOR JOB

LOS ANGELES, Sept. 21.—Ben C. Gerwick, San Francisco, at \$236,117, today submitted the low bid on Proposition One to the Los Angeles Harbor Commission for construction of reinforced concrete apron wharf facilities at Berths 57 and 60, Wilmington.

The Los Angeles Harbor Commission opened bids this morning on the contract—one of the largest to be placed on the market for harbor work recently. Proposition One calls for construction of reinforced concrete wharf facilities. Alternate bids were submitted, also.

the trans-park road. The first of four sections of the Nineteenth avenue project was completed recently by Charles L. Harney, and the second section is now under construction by the same contractor. Two sections remain to be constructed.

Bidders on the bridge approach contract submitted unit prices on forty-four items. Principal items included: 310,000 cubic yards of unclassified excavation; 1900 cubic yards of trench excavation; 21,500 cubic yards of structural excavation; 146,000 cubic yards of tunnel and retaining wall backfill; 40,000 cubic yards of mud removal; 480 cubic yards of Portland cement concrete pavement; 21,000 cubic yards of Portland cement concrete structures; 2,900,000 lbs. of bar reinforcing steel; 10,000 lbs. of miscellaneous steel; and 6,100,000 station yards overhaul.

No other bids were opened by the State Division of Highways today.

KELLY AWARDS PACIFIC COLONY PIPELINE JOB

Station Improvement, Traffic Stripe Contracts Awarded

SACRAMENTO, Sept. 21.—State Director Earl Lee Kelly of the Department of Public Works today awarded three contracts aggregating \$94,685 for work in Los Angeles, Mono and San Benito counties.

The largest contract awarded today by Mr. Kelly went to Warren Southwest, Inc., Los Angeles, at \$64,915, for construction of a pipe line for Pacific Colony at Spadra, Los Angeles county.

The pipeline will be a 12-inch line about 24,560 feet long, connecting the Spadra domestic storage reservoir with the property of the Pomona Irrigation Company in the City of Pomona.

Work also includes construction of headworks and equipment and a 6-inch pipeline about 1500 feet long, to connect the 12-inch line to an irrigation system.

Water Shortage

Construction of the pipeline was made necessary by the shortage of water at Pacific Colony. The Colony at present depends on wells for its water supply. However, the wells cannot supply the necessary amount of water, and the pipeline will be constructed in order to obtain water from the Pomona Irrigation Company line.

The second largest contract was awarded to R. J. Daum, Inglewood at \$24,000, for construction of a boiler house, gas and oil station, at the Division of Highways Station at Conway Summit, Mono Co. The sheds will be wood frame buildings covered with corrugated iron and having concrete floors.

The third contract went to S. A. Cummings, San Diego, at \$5,270, for applying about 820 miles of traffic stripe to pavement in San Benito, Monterey, San Luis Obispo and Santa Barbara counties.

SCHEDULE BIDS ON SIX STATE HIGHWAY JOBS

**Bids Oct. 19 on Span Railway
Telephone Facilities, Las-
sen Grading**

SACRAMENTO, Sept. 27.—The State Highway Commission today authorized calling for bids on six highway, bridge and telephone facility contracts in San Francisco, Lassen, Ventura, Riverside and Los Angeles counties.

Bids on the two Northern California jobs will be opened October 19; the remaining bids will be opened in Los Angeles, October 20.

The San Francisco contract calls for construction of a telephone system for the railway facilities of the San Francisco-Oakland Bay Bridge. Installation of cable; magnet subscriber sets; battery subscriber sets; terminal boxes and switchboards are involved, according to engineers.

The second northern contract involves about 4.4 miles grading and surfacing with crusher run base and road-mixed surfacing between Madeline and Likely in Lassen Co. Principal items include: 51,000 c.y. of unclassified excavation; 18,000 c.y. of imported borrow; 30 c.y. of Portland cement concrete; 1,400 pounds of reinforcing steel; 6,900 tons of mineral aggregate road-mixed surfacing; and 15,000 tons of crusher run base.

Two of the contracts for which bids were called today involve work in Los Angeles county. The first calls for construction of a reinforced concrete girder overhead crossing over the tracks of the Southern Pacific railway about six miles east of Saugus. The second involves grading 1.7 miles of highway between the Rivera Underpass and Shenandoah avenue in Los Angeles. Surfacing with Portland cement concrete, asphaltic concrete and plant-mixed surfacing is involved, also.

The third Southern California job calls for construction of a reinforced concrete slab bridge across Sespe Overflow about 1 mile west

BIDS OCTOBER 14 ON CCC BUILDINGS

Bids for fabrication of eleven portable demountable buildings for CCC camps were invited yesterday by the Office of the Quartermaster for the Ninth Corps Area. Proposals on the contract will be opened at the Presidio of San Francisco October 14.

Deposit on plans for the contract is \$10.00. The buildings will be used by CCC camps located in the Ninth Corps Area, the Quartermaster office said.

Hanrahan-Connolly Awarded Harbor Job

Hanrahan - Connolly Company, San Francisco, at \$104,258 yesterday was awarded the contract by the U. S. Engineer Office, for constructing a rubble mound sand barrier in Crescent City harbor, Del Norte county.

The barrier will extend from the shore at the foot of Josephine street about five hundred feet southeasterly from the shore end of the Shell Company wharf, at Crescent City, southwesterly for a distance of about 2660 ft. to Whaler Island.

Only three bids were submitted on the contract early this month. Other bidders were: Basalt Rock Co., Inc., at \$110,920; and Kern & Kibbe, Portland, at \$122,640.

of Fillmore and widening approaches in Ventura county.

Bids will be opened October 20 for construction of two reinforced bridges—one across Coachella Valley storm drain, and one across a drainage ditch in Riverside county.

The first bridge will consist of thirteen 30-foot spans and two 9-foot cantilever spans, and the second, of two 29-foot spans and two 8-foot 8-inch cantilever spans.

Steel housing will make its official bow to the public at the California World's Fair on Treasure Island in 1939. The new type home is ultra-streamlined.

S. F., MONROVIA FIRMS APPEAR LOW ON S. P. JOB

**Thirty-Two Firms Offer Varied
Proposals on Rail
Relocation**

SACRAMENTO, September 26.—Granfield-Farrar & Carlin, San Francisco, at \$812,380.90, and West Construction Company, Monrovia, at \$904,981, today submitted the apparent low bid to the U. S. Bureau of Reclamation for construction of a 14-mile section of the Southern Pacific railroad relocation around the site of Shasta Reservoir.

Granfield-Farrar & Carlin's bid covers Schedules One through Four and West Construction Company's proposal covers Sched. Five, only.

The first four schedules involve construction of earthwork and structures, while Schedule Five involves construction of earthwork, tunnels and structures. Two half-mile tunnels at Bass Hill summit are called for.

Thirty-Two Bids

Final determination of the low proposals will be arrived at following study of the bids submitted by thirty-two firms today.

Walker R. Young, Supervising Engineer of the Central Valley Project, said: "All the bids will be considered and every possible combination of offers computed, taking into consideration all stipulations by the bidders, before the contracts are awarded."

The bid opening started at 10 A. M. in the quarters of the Sacramento Chamber of Commerce and lasted throughout the day. Approximately 110 people attended the meeting which had been postponed from last Wednesday.

The final outcome of the bid opening was necessarily confused by the reading of thirty-two proposals on all or portions of the 5-schedule form which involved one hundred and seventy-two items. Numerous stipulations changing contractors' prices on different combinations of schedules further obscured the order of bidders.

STATE INVITES BIDS ON FOUR FAIR PROJECTS

Auditorium, Livestock Barn To Be Constructed On Shoals

The State of California's construction program for the Golden Gate International Exposition on Yerba Buena Shoals received added impetus yesterday with the issuance of four calls for bids for work on Treasure Island.

Bids for general construction of the Auditorium Building on the Shoals will be opened October 21, at the office of the California Commission for the Golden Gate International Exposition in San Francisco, it was announced.

In addition, the Commission revealed, bids will be opened October 24 for general construction of the California Coliseum Livestock Barn on Treasure Island.

On the same date bids for plumbing work and for electrical work for the Coliseum Livestock Barn will be opened. Separate proposals will be submitted on the plumbing and electrical work.

With yesterday's action by the Commission, the State's construction program for the World's Fair hit a new high level of activity.

Last week bids were called, to be opened October 14, for construction of electrical work and plumbing work for the Southern Counties Building; the San Joaquin Valley Building; the Alta California Building; and the Mission Trails Wall. As in the case of the Livestock Barn, separate contracts will be awarded on each section of the work.

The bids calls fore-shadowed the action of the Commission this week in awarding the contract for general construction of the buildings to Barrett & Hilp at the bid price of \$103,678.

Bids on the job were opened September 30.

All bids will be opened in the Commission's office at 660 Market street in San Francisco.

Plans and specifications may be obtained from the same office upon deposit of \$25, returnable. Plans are on file also at the office of

MATERIAL PRICE INDEX DECLINES

The building material price average for the week ended September 24 stood at 89.4 per cent of the 1926 level, the U. S. Bureau of Labor Statistics reported yesterday. A drop of about two-tenths of one per cent from the index for the preceding week resulted from weakening prices for yellow pine flooring and timbers, turpentine, sand and gravel, according to the bureau.

Prices for yellow pine lath, red cedar shingles, white lead, lead pipe, and copper sheets and wire were higher. Brick, cement and structural steel prices remained unchanged during the week.

CONCRETE BLDG. UNIT STANDARD AVAILABLE

The Division of Simplified Practice of the National Bureau of Standards has announced that printed copies of the second revision of Simplified Practice Recommendation R32, Concrete Building Units, are now available. This recommendation lists sizes and tolerances for load and non-load bearing block and tile, and for face and common concrete brick, and is effective from August 1, 1938. Copies may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., for five cents each.

The original recommendation, which was approved by a general conference of producers, distributors, and users in 1924, reduced the number of sizes of concrete building units to thirteen, and established one size for concrete brick. In 1932 the industry accepted the Standing Committee's suggested revision which modified some dimensions and added four units to the recommended list. The present revision adds four 11 1/4-in. units to the schedule.

State Architect George B. McDougall, Public Works Building, Sacramento, and at the Builders' Exchanges in San Francisco and Oakland.

S. F. BUILDING PERMIT LEVEL WELL OVER '37

Oct. Permit Volume Steady; Total Reflects Gain Over Last Year

Building in San Francisco during September continued to maintain the level set during the past few months with 655 building permits issued for construction valued at \$1,768,291, according to Head Clerk S. J. Rosenblum of the Central Permit Bureau.

The September building permit total was approximately the same as the August figure and almost double the September, 1937, total.

Frame construction continued to provide the backbone of the industry with 160 permits issued for construction costing \$675,274, as compared to 93 permits issued in September, 1937, for a total of \$423,470. The total last month was \$1,166,110.

The total for the first 9 months of the year was \$15,415,525, a drop from the \$17,280,594 figure for the same period last year.

Following is the comparison of San Francisco building totals for September, this year and last:

Class	Sept., 1938		Sept., 1937

No. Est. Cost	No. Est. Cost
5,838	\$15,415,525	6,024	\$17,280,594	

Shipments of electric industrial trucks and tractors, as reported by ten manufacturers representing the entire industry, totaled 69 for August 1938, as compared with 41 for July 1938, 173 for August 1937 and 125 for August 1936. These data were released by Director W. L. Austin, Bureau of the Census, Department of Labor.

L. A. CO.—PIPE LINE, PALOS VERDES FEEDER—(Dist.)

LOS ANGELES, Calif. — American Concrete & Steel Pipe Co., 4635 Firestone Blvd., South Gate, at \$52,708.66 (Schedule 24-P) and United Concrete Pipe Corp., Box 1, Sta. H, Los Angeles, at \$498,610.27 (Schedule 25-P) or a combined total of \$1,031,318.93 submitted low bids to the Metropolitan Water District, 306 W. 3rd St., Los Angeles, for the construction of (Sch. P) precast concrete or (Sch. SC) welded steel-plate pipe lines and appurtenant works for Palos Verdes feeder of the Colorado River Aqueduct distribution system; Spec. No. 283. The work is located in the cities of Los Angeles and Torrance and in unincorporated territory of the County of Los Angeles, and comprises approx. 13.5 miles of pipe line construction. Proposals will be received for two alternative types of pipe line. The lengths, diameters, etc., are as follows:

SCH. 24—6.8 miles of 50-in. Lock-joint steel cylinder reinf. precast concrete pipe (P).

SCH. 25—6.7 miles of 50-in. Lock-joint steel cylinder reinf. precast concrete pipe (P).

ALTERNATIVES

SCH. 24—6.8 miles of 51-in. welded steel-plate pipe with guniting exterior coating and centrifugally applied (spun) mortar-lining (SC).

SCH. 25—6.7 miles of 51-in. do (SC). Award will be made on Schedules 24P and 25P, or on 24SC and 25SC.

Work involves:

SCHEDULE 24P

Precast concrete pipe for the Palos Verde feeder of the Colorado River Aqueduct distribution system between station 952 plus 60 and 1312 plus 25. Inside diameter of pipe 50 inches; length, 35,360 ft.

- (1) 100,000 c.y. trench excav.;
- (2) 1,200 c.y. excav. for struc.;
- (3) 71,000 c.y. backfill;
- (4) 1,000 tons rock refill;
- (5) 600 c.y. concrete in structures;
- (6) 300 c.y. concrete in anchors, manhole bases, and supports across trench;
- (7) 500 c.y. concrete in cradle;
- (8) 33,472 l.f. precast conc. pipe, dia. 50-in.;
- (8a) do, with standard lock-joint;
- (8b) 2,263 l.f. precast conc. pipe, 50-in. with welded lock-joints;
- (9) furnishing & placing steel cylinder reinf.;
- (9a) does not apply here;
- (9b) 1,528 l.f. 13-ga.;
- (9c) 22,498 l.f. 12-ga.;
- (9d) 9,295 l.f. 11-ga.;
- (9e) 672 l.f. 3/4-in. thick;
- (9f) 93 l.f. 1/2-in. thick;
- (10) 4,850,000 lbs. furnish and place reinf. steel in precast concrete pipe;
- (11) 113,000 lbs. place reinf. steel in structures;
- (12) furnish and install 51-in. spun mortar lined steel pipe;
- (12a to 12c) does not apply here;
- (12d) 44 l.f. 1/2-in. thick;
- (13) 44 l.f. incasement under rail-

- way track;
- (14) does not apply here;
- (15) 1,400 sq. ft. pipe coating, Type B
- (16) does not apply here;
- (17) 65,000 lbs. furnish and install steel thimbles and covers;
- (18) 52,000 lbs. furnish and install steel manifolds, reducing sections, and insulating joint assemblies;
- (19) 2 points furnish and install electrolysis test points, type 1;
- (20) 2 points do, type 2;
- (21) 2 points do, type 3;
- (22) 60,000 lbs. install shutoff, regulating and relief valves;
- (23) 50,000 lbs. install misc. metal;
- (24) 100 l.f. install 6-in. conc. pipe;
- (25) 100 l.f. install 8-in. conc. pipe;
- (26) 150 l.f. furnish and install 6-in. cast-iron pipe for sewer reconstruction;
- (27) 150 l.f. furnish and install 8-in. do;
- (28) 50 l.f. remodel house connection sewers;
- (29) 320 l.f. furnish & install fence.

SCHEDULE 25-SC

- Guniting coated welded steel pipe with spun mortar lining for Palos Verdes feeder of the Colorado River Aqueduct distribution system, between stations 952 plus 60 and 1312 plus 25. Inside diameter of steel pipe 5-in.; length 33,950 ft.
- (1) 95,000 c.y. trench excav.;
- (2) 1,200 c.y. excav. for struc.;
- (3) 72,000 c.y. backfill;
- (4) 1,000 tons rock refill;
- (5) 600 c.y. concrete in structures;
- (6) 300 c.y. concrete in anchors, manhole bases, and supports across trench;
- (7) 500 c.y. concrete in cradle;
- (8 to 10) do not apply here;
- (11) 113,000 lbs. place reinf. steel in structures;
- (12) furnish and install 51-in. spun mortar lined steel pipe;
- Plate thickness (inches)
- (12a) 26,222 l.f. 3/4-in.;
- (12b) 8,414 l.f. 13/32-in.;
- (12c) 1,204 l.f. 7/8-in.;
- (12d) 44 l.f. 1/2-in.;
- (13) 44 l.f. incasement under railway track;
- (14) 334,000 sq. ft. pipe coating, type A;
- (15) 143,000 sq. ft. do, type B;
- (16) 11,500 sq. ft. do, type C;
- (17) 62,000 lbs. furnish and install steel thimbles and covers;
- (18) 45,000 lbs. furnish and install steel manifolds, reducing sections and insulating joint assemblies;
- (19) 2 points furnish and install electrolysis test points, type 1;
- (20) 2 points do, type 2;
- (21) 2 points do, type 3;
- (22) 60,000 lbs. install shutoff, regulating and relief valves;
- (23) 50,000 lbs. install misc. metal;
- (24) 100 l.f. install 6-in. conc. pipe;
- (25) 100 l.f. install 8-in. conc. pipe;
- (26) 150 l.f. furnish and install 6-in. cast-iron pipe for sewer re-

- construction;
- (27) 150 l.f. furnish and install 8-in. do;
- (28) 50 l.f. remodel house connection sewers;
- (29) 320 l.f. furnish & install fence.

SCHEDULE 25-P

- Precast concrete pipe for the Palos Verdes feeder of the Colorado River Aqueduct distribution system between stations 1312 plus 25 and 1668 plus 00. Inside dia. of pipe, 50-in.; length, 35,360 ft.
- (1) 113,000 c.y. trench excav.;
- (2) 400 c.y. excav. for struc.;
- (3) 84,000 c.y. backfill;
- (4) 1,000 tons rock refill;
- (5) 450 c.y. concrete in struc.;
- (6) 180 c.y. concrete in anchors, manhole bases and supports across trench;
- (7) 750 c.y. concrete in cradle;
- (8) Precast concrete pipe, dia. 50-in.
- (8a) 33,561 l.f. with std. lock-joints;
- (8b) 1,539 l.f. with welded lock-joints;
- (9) furnish and place steel cylinder reinf.;
- (9a) 4,230 l.f. 14-ga.;
- (9b) 1,662 l.f. 13-ga.;
- (9c) 15,919 l.f. 12-ga.;

- (9e) 592 l.f. 3/4-in.;
- (9f) 30 l.f. 1/2-in.;
- (10) 4,550,000 lbs. furnish and place reinf. steel in precast concrete;
- (11) 78,000 lbs. placing reinf. steel in struc.;
- (12) furnish and install 51-in. spun mortar lined steel pipe;
- Plate thickness (inches)
- (12a to 12c) do not apply here;
- (12d) 72 l.f. 1/2-in.;
- (13) 72 l.f. incasement under railway tracks;
- (14) 400 sq. ft. pipe coating, type A;
- (15) 1,700 sq. ft. pipe coating, type B
- (16) does not apply here;
- (17) 62,000 lbs. furnish and install steel thimbles and covers;
- (18) 60,000 lbs. furnish and install steel manifolds, reducing sections and insulating joint assemblies;
- (19) 2 points furnish and install electrolysis test points, type 1;
- (20) 1 point do, type 2;
- (21) 3 points do, type 3;
- (22) 40,000 lbs. install shutoff, regulating and relief valves;
- (23) 50,000 lbs. install misc. metal;
- (24) 100 l.f. install 6-in. conc. pipe;
- (25) 100 l.f. install 8-in. conc. pipe;
- (26) 550 l.f. furnish and install 6-in. cast iron pipe for sewer reconstruction;
- (27) 200 l.f. furnish and install 8-in. cast iron pipe for sewer reconstruction;
- (28) 50 l.f. remodel house connection sewers;
- (29) does not apply here.

SCHEDULE 25-SC

- Guniting coated welded steel pipe with spun mortar lining for Palos Verdes feeder of the Colorado River Aqueduct distribution system, between stations 1312 plus 25 and 1668 plus 00. Inside dia. of steel pipe, 51-in.; length, 35,360 ft.

STIPULATIONS

- (A) American Concrete and Steel Pipe Co., P. O. Box 1428, Arcade Sta., Los Angeles: no stipulations.
- (B) United Concrete Pipe Corp., P. O. Box 1, Sta. H, Los Angeles: Will accept either 24P or 25P alone or together, but will only accept 24SC and 25SC together; will not accept 24SC without 25SC or 25SC without 24SC.
- (C) EmSCO Derrick & Equipment Co., P. O. Box 1408, Arcade Sta., Los Angeles: any award will not be considered unless it covers both schedules.
- (D) Western Pipe and Steel Co., P. O. Box 1120, Arcade Station, Los Angeles: award based upon award of both schedules; will not accept either alone.
- (E) R. G. Clifford, 215 Market St., San Francisco: no stipulations.
- (F) J. F. Shea, 1102 Oviatt Bldg., Los Angeles: if awarded 24SC and 25SC deduct from Item 12 of both schedules 78c per l.f.
- (G) Winston Bros. Co., 411 W 5th St., Los Angeles: for award of both schedules together deduct 40c c.y. from Item 1 of 24SC; 18c c.y. from Item 25SC; and 50c l.f. from Items 12a, 12b, 12c and 12d of Sch. 24SC and 25SC.
- (H) Griffith Co., 502 Los Angeles Railway Building, Los Angeles: if awarded both schedules deduct from 12a, 12b, 12c and 12d of both schedules, 78c l.f.

FOREIGN WORK AT EXPOSITION TO BE SPEEDED

Commissioners, Architects Arrive to Supervise Erection Of Pavilions

From the far corners of the earth, foreign commissioners and architects are gathering in San Francisco to erect their countries' buildings and direct installation of their exhibits at the California World's Fair on Treasure Island.

With twenty-nine countries definitely "signed up" as participants and another thirteen nations reported favorably inclined, the international aspect of the fast-approaching Exposition is assured, it was announced by Major O. J. Keatinge, Chief of Foreign Participation.

Robert Deppe, architect for the Netherlands East Indies building, arrived in San Francisco Friday from Batavia, Java, and immediately went into conference with Dr. H. A. van Coenen Torchiana, Consul General of the Netherlands in San Francisco.

Commissioner Juan de Marval of Argentina traveled from Buenos Aires to San Francisco by air and arrived here Saturday.

Other foreign commissioners and architects for Exposition buildings now in San Francisco include Commissioner Hugo Roman of Ecuador; Dr. Julio Enrique Avila, Commissioner from El Salvador; Commissioner C. C. Huang for China; Commissioner Fernando Berckemeyer for Peru; Commissioner Kanzo Shiozaki for Japan; Commissioner Arthur H. O'Connor of Australia; Commissioner R. W. Marshall for New Zealand; Georges Besse, architect for the French pavilion, from Paris, France; Jean Mourraile, architect-contractor in charge of work on the French Indo-China pavilion, also of Paris; and Armando d'Ans, architect for the Argentine pavilion.

Commissioner Eurico Penteado of Brazil, now in New York, is due for a second visit to San Francisco shortly.

WARNER LOW ON COLORADO DAM

DENVER, Colo., Oct. 12.—Warner Construction Co., Chicago, Ill., today submitted a low bid of \$4,226,206 to the U. S. Bureau of Reclamation for construction of the Green Mountain Dam and Power Plant of the Colorado-Big Thompson Project.

Second low bidders were the Utah Construction Company of Ogden, and San Francisco, and Winston Bros. Co., Minneapolis, with a joint proposal of \$4,258,851.

AGC CHAPTER PLANS ANNUAL MEET DEC. 9-10

Western engineering and heavy construction contractors will gather in San Francisco December 9 and 10 at the 20th annual convention of Northern California Chapter, Associated General Contractors of America.

This was announced yesterday by Floyd O. Booe, secretary-manager of Northern California Chapter. The two-day convention will take place at the Palace Hotel, culminating in the annual banquet of the contractors' organization the evening of December 10.

Highlight of the chapter convention sessions will be the adoption of final plans for the National Convention of the Associated General Contractors of America, to be held in San Francisco March 5 to 11, 1939.

As host chapter, the Northern California group already is engaged in the preliminaries to the national conclave, which, it is declared, will be the largest convention gathering of the entire Exposition year.

Guests of honor at the December convention of Northern California Chapter will include state and Federal highway officials and engineers, city officials of San Francisco; officials of P.W.A., with whom the construction industry is working in close cooperation, and representatives of labor.

STATE OFFICE BUILDING OUT FOR PROPOSALS

Bids November 9 on Contract For Big Sacramento Structure

SACRAMENTO, Oct. 11.—Bids for construction of State Office Building No. 3 in Sacramento, one of the year's largest public building contracts in California, were invited here today by the State Division of Architecture.

Proposals will be opened November 9, State Architect George B. McDougall announced.

Pile foundations, pile caps and rough concrete basement slab have been constructed under separate contracts. Bids for the remainder of the work will be received November 9 as follows:

- General work;
- Electric work;
- Plumbing;
- Heating and air conditioning Elevators.

The new State office building will be an imposing addition to Sacramento's group of public structures. It will be a five-story and basement building, of reinforced concrete construction.

Located on M street between 10th and 11th streets, it will cover a ground area of 150 by 315 feet in size.

The building will contain its own heating and air conditioning systems.

A deposit of \$50 will be required on plans for the general work, the State Architect's office announced. Plans for other portions of the work may be obtained from the Division of Architecture upon deposit of \$25.00.

BOYD LIGHTING AND FIXTURE CO. MOVES

The Boyd Lighting and Fixture Company have moved their factory and showrooms to new, improved quarters at 56 Twelfth street, between Market and Mission streets, it is announced.

The Boyd Lighting and Fixture Company was formerly located at 278 Post street. The new telephone number is HEmlock 4300.

PWA Applications Far Exceed Available Funds, Final Nation-Wide Tally Reveals

Shattering all previous records, communities and States throughout the Nation filed 12,804 applications for more than four billion dollars worth of PWA non-Federal projects in the brief 101-day period allowed for filing applications under the 1938 program which ended Friday,

Public Works Administrator Harold L. Ickes announced this week.

Completion of a telegraphic survey of the seven PWA regional offices showed that American municipalities, volunteering to assess themselves 55 per cent of the total cost from local funds, asked PWA aid to finance \$4,005,904,186 worth of construction in the 1938 program. In submitting the 12,804 applications, they asked for \$768,298,529 in loans and \$1,881,884,891 in grants, or a total of \$2,650,183,420 to finance the more than four billion dollars worth of desired work.

The rush to file applications was so great that the telegraphic survey indicated something more than 2,500 applications poured into PWA offices Friday, the last day for filing. No such rush could be recalled in all previous PWA experience. By plane, automobile and train, representatives of cities and towns hastened to file their applications in a dramatic, last-minute rush. Application for wharf project for Martha's Vineyard to replace storm damage was flown to Washington by plane from that place. In Nebraska, communities some distance from the Omaha office dropped application papers on the desk of the project engineer for the Nebraska power projects as the nearest PWA representative. Many of the offices stayed open until midnight, and several applications reached the Chicago regional office just a few moments before the midnight closing.

Over All Estimates

So great was the influx of applications that it by far exceeded all PWA estimates.

This response to the Public Works Administration program within such a short period breaks all previous records built up by PWA since 1933. Administrator Ickes reported. The telegraphic survey was based on the number of applications reaching the PWA offices as of the close of business on September 30, the last date under the 1938 PWA Act on which applications could be received. (The 1938 Act was signed by President Roosevelt June 21, 1938, and applications then were considered for projects.)

Meanwhile, allotments to projects approved by President Roosevelt have been moving steadily out from the Washington headquarters while the applications have been coming in. As of today a check showed that PWA has allotted funds to 6,724 projects, including both Federal and non-Federal projects. The 6,724 projects involve \$1,503,107,458 worth of construc-

tion and are financed by allotments totaling \$828,651,419. The allotment figures are made up of \$49,538,863 in loans and \$779,112,556 in grants.

Last Minute Rush

Those of the 12,804 applications which have not yet been reviewed will be given immediate consideration and as may as possible which meet requirements will be allotted, to the limit of available funds. This phase of the work will of necessity be speedy, because the second dead-line in the PWA law requires that all projects be under construction by January 1, 1939.

PWA Region No. 1, comprising New York and Pennsylvania and the New England States, and running as far south as Maryland, led all other regions both in number of applications and volume of construction requested. This area asked for 2,891 projects with a total construction value of \$1,234,840,469. This construction would be financed by applications for \$846,213,171 in allotments, including \$191,328,035 in loans and \$654,885,136 in grants.

Second largest number of requests came from PWA Region No. 2, taking in the States of West Virginia, Ohio, Indiana, Illinois, Michigan and Wisconsin.

Municipalities and public bodies in this area filed applications for 2,643 projects involving \$677,956,038 worth of construction. It was proposed to finance this construction with allotments of \$364,273,571 made up of \$59,451,105 in loans and \$304,822,466 in grants.

The third largest number of applications were filed by towns, cities and State in Region No. 3, with headquarters at Atlanta and including the Southeastern States. This area asked for 2,063 projects having a total value of \$487,490,394.

Funds Limited

The number of applications made by municipalities and States for PWA aid so far exceeds the funds made available under the 1938 PWA Act that a large number of eligible projects will be left over when available funds have been exhausted. Among the projects allotted in the present program were 1,800 eligible projects left over from previous programs. When these are subtracted from the 5,715 non-Federal projects allotted to date, it will be seen that 3,915 new applications have been approved to date out of the 12,804 filed, leaving a balance of 8,889 projects either unallotted, unexamined, or rejected. ORDERS GAIN, COAST LUMBER MILLS REPORT

New Business Up 10 Million Feet Over Preceding Week; Shipments Drop

A sharp increase in new business and continued declines in production and shipments featured the weekly report issued yesterday by the West Coast Lumbermen's Association.

A total of 151 down and operating mills in Washington and Oregon, which reported to the Association for the week ending Oct. 1, 1938, produced 94,050,146 board feet of lumber. At the rate of cutting at the reporting mills, the entire industry produced 59.8 percent of its average weekly cut during 1926-1929.

The new business reported for the week by the 151 mills was 94,685,678 board feet. Shipments were 91,529,674.

Details of orders and shipments as reported by the 151 mills are:

	Orders	Shipments
Rail	37,842,863	41,195,758
Domestic		
Cargo	37,741,493	33,432,604
Export	6,736,375	4,536,365
Local	12,364,947	12,364,947
	94,685,678	91,529,674

The unfiled order file at these mills stood at 259,365,237 board feet.

As compared with the preceding week, reported orders were approximately 10,000,000 feet higher.

Production for the week was off about 1,200,000 feet from the preceding week's figure, while shipments were about 4,000,000 ft. less.

lotments will continue to be made during the next two weeks until the funds authorized by Congress have been completely allotted to projects which meet all requirements. There will then be a large balance of eligible, but unallotted projects, owing to the enormous demand for PWA aid.

Analysis of the number of applications and the amounts requested indicate that the average application filed was for an allotment of approximately \$207,000, which was to be used to finance construction costing around \$313,000. Schools and educational buildings led the number of requests, closely followed by applications for sewers, waterworks, sewage disposal systems, city halls and courthouses, roads, bridges and the like.

New orders for fabricated steel plate amounted to 22,069 tons during August, as compared to orders for 31,763 tons booked during August, 1937, according to the Bureau of Census.

Appointments to 47 A. I. A. Committees Announced; California Architects Named

Appointments to forty-seven committees of the American Institute of Architects are announced by Charles D. Maginnis of Boston, president of the Institute. The committee groups, with more than 200 members, will carry on an enlarged program of Institute activity in housing, city planning, foreign relations, civic design, education, allied arts, public works, industrial relations, and other fields during 1938-39.

The Committee on Housing, headed by Walter R. McCormack of Cleveland as chairman and William Finley Parker of Boston as vice-chairman, will cooperate with government agencies, with the construction industry, and with the National Real Estate Board in promoting building recovery. The following have been named to the Executive Committee on Housing: Kenneth W. Dalzell, East Orange, N. J.; Albert J. Evers, San Francisco; John Reed Fugard, Chicago; Frederick W. Garber, Cincinnati; W. H. Graham, Jr., Philadelphia; George H. Gray, New Haven, Conn.; Albert D. Kohn, New York; E. Philip Schreier, Washington, D. C.; Edmond H. Shreve, New York; William T. Warren, Birmingham, Alabama.

Housing Movement

Mr. Gray was chosen chairman of the Subcommittee on Study of Basic Principles for National Housing Movement. Other members include: Franklin O. Adams, Tampa, Fla.; Henry Stern Churchill, Boston; William Clair Ditchy, Detroit; Moise H. Goldstein, New Orleans; Horace W. Peaslee, Washington; Walter H. Thomas, Philadelphia; Mr. Evers, Mr. Fugard, Mr. Shreve, Mr. Kohn, Mr. Parker.

Mr. Dalzell is chairman of the committee on the Small House problem, other members of which include: E. Geoffrey Bangs, Oakland; Eph H. Cameron, San Antonio, Texas; Clement W. Fairweather, Tucson, N. J.; Herbert Foltz, Indianapolis, Ind.; J. Andre Foulis, New York; Carl E. Heimdt, Western Springs, Ill.; Robert Taylor Jones, Minneapolis, Minn.; Miss Justement, Washington, D. C.; James W. Kidney, Buffalo, N. Y.; Charles Dana Loomis, Baltimore, Md.; Henry A. Martin, Rochester, N. Y.; Richard W. Mecasay, Philadelphia; Andrew W. Moran, Detroit; C. Mr. Bergstrom, treasurer of the Institute, heads the Investment Committee, other members of which are Robert K. Fuller of Denver, and Mr. Evers.

PWA Applications Far Exceed Available Funds, Final Nation-Wide Tally Reveals

Shattering all previous records, communities and States throughout the Nation filed 12,804 applications for more than four billion dollars worth of PWA non-Federal projects in the brief 101-day period allowed for filing applications under the 1938 program which ended Friday.

Those of the 12,804 applications which have not yet been reviewed will be given immediate consideration and as may as possible which meet requirements will be allotted, to the limit of available funds. This phase of the work will of necessity be speedy, because the second dead-line in the PWA law requires that all projects be under construction by January 1, 1939.

PWA Region No. 1, comprising New York and Pennsylvania and the New England States, and running as far south as Maryland, led all other regions both in number of applications and volume of construction requested. This area asked for 2,891 projects with a total construction value of \$1,234,840,469. This construction would be financed by applications for \$846,213,171 in allotments, including \$191,328,035 in loans and \$654,885,136 in grants.

Second largest number of requests came from PWA Region No. 2, taking in the States of West Virginia, Ohio, Indiana, Illinois, Michigan and Wisconsin.

Municipalities and public bodies in this area filed applications for 2,643 projects involving \$677,956,038 worth of construction. It was proposed to finance this construction with allotments of \$364,273,571 made up of \$59,451,105 in loans and \$304,822,466 in grants.

The third largest number of applications were filed by towns, cities and State in Region No. 3, with headquarters at Atlanta and including the Southeastern States. This area asked for 2,063 projects having a total value of \$487,490,394.

Funds Limited

The number of applications made by municipalities and States for PWA aid so far exceeds the funds made available under the 1938 PWA Act that a large number of eligible projects will be left over when available funds have been exhausted. Among the projects allotted in the present program were 1,800 eligible projects left over from previous programs. When these are subtracted from the 5,715 non-Federal projects allotted to date, it will be seen that 3,915 new applications have been approved to date out of the 12,804 filed, leaving a balance of 8,889 projects either unallotted, unexamined, or rejected. ORDERS GAIN, COAST LUMBER MILLS REPORT

New Business Up 10 Million Feet Over Preceding Week Shipments Drop

A sharp increase in new business and continued declines in production and shipments featured the weekly report issued yesterday by the West Coast Lumbermen's Association.

A total of 151 down and operating mills in Washington and Oregon, which reported to the Association for the week ending at 1, 1938, produced 94,050,146 board feet of lumber. At the rate of cutting at the reporting mills, the entire industry produced 59.8 per cent of its average weekly cut during 1926-1929.

The new business reported for the week by the 151 mills was 4,685,678 board feet. Shipments were 91,529,674.

Details of orders and shipments as reported by the 151 mills are:

	Orders	Shipments
Rail	37,842,863	41,191,538
Domestic		
Cargo	37,741,493	33,435,004
Export	6,736,375	4,531,665
Local	12,364,947	12,364,447
	94,685,678	91,529,674

The unfilled order file at these mills stood at 259,365,237 board feet.

As compared with the preceding week, reported orders were approximately 10,000,000 feet higher.

Production for the week was off about 1,200,000 feet from the preceding week's figure, while shipments were about 4,000,000 feet less.

Allotments will continue to be made during the next two weeks until the funds authorized by Congress have been completely allotted to projects which meet all requirements. There will then be a large balance of eligible, but unallotted projects, owing to the enormous demand for PWA aid.

Analysis of the number of applications and the amounts requested indicate that the average application filed was for an allotment of approximately \$20,000, which was to be used to finance construction costing around 13,000. Schools and educational buildings led the number of requests closely followed by application for sewers, waterworks, sewage disposal systems, city halls and urt-houses, roads, bridges and the like.

New orders for fabricated steel plate amounted to 22,069 tons during August, as compared to orders for 31,763 tons booked during August, 1937, according to the Bureau of Census.

CONTRACT AWARDED

GRAND COULÉE, Wash.—Consolidated Builders, Inc., has been awarded a supplementary contract by the Bureau of Reclamation at \$773,100 to excavate 12 tunnels to their full length through which water will be pumped to the balancing reservoir in Washington. The contractors engaged in completing the Columbia River Dam were under contract to excavate the tunnels to a depth of 36 feet into the canyon wall. The change will require several hundred additional feet of excavation at an angle upward to the top of a rise. Water pumped through the tunnels will flow into the reservoir in the Grand Coulee itself. Officials explained that excavation already done has disclosed such a poor class of rock that engineers said it will be necessary to complete all excavation and blasting now.

State Architect Geo. B. MacDougall To Retire Nov. 1

Following twenty-five years of service to the State, George B. MacDougall, State Architect, will retire November 1, the Department of Public Works announces.

Mr. MacDougall was appointed State Architect in 1913, and since that time has supervised the designing of California's State-owned buildings.

San Francisco

The retiring State Architect was born in San Francisco and began the practice of architecture in this city in 1893.

In 1895 he designed the California Bible Society Building. Eighteen years of activity in the architectural field in the Bay Region followed, culminating with his appointment as State Architect in 1913.

During the time he engaged in private practice in San Francisco, he designed many of the city's structures, including some of the work which followed the disastrous San Francisco fire in 1906.

His brother, Benjamin G. MacDougall, who died recently was practicing architecture during the same period, principally in the Central California region.

Leading Designer

During Mr. MacDougall's tenure as State Architect, California has experienced its greatest building program. Many of the State Capitol buildings and State buildings in other parts of California were designed by him.

At present, with the date of his retirement drawing near, Mr. MacDougall is engaged in designing structures for a State-wide building program now underway.

PAMPHLET ISSUED BY WESTINGHOUSE

Rectox Rectifiers designed to counteract galvanic action and electrolysis by maintaining a small direct current from ground to structure, a technique known as "cathodic protection" are described in a 4-page illustrated leaflet published by Westinghouse Electric & Manufacturing Company.

200 DELEGATES AIDED SUCCESS OF SACA MEET

Election of Officers Closes State Association's Convention

The Eleventh Annual Convention of the State Association of California Architects, one of the most successful gatherings ever held by the Association, was a memory yesterday as most of the few remaining delegates left for their homes.

A final check revealed that more than 200 delegates had registered for the San Francisco convention.

Although numerous informal gatherings were held on Sunday, the meet officially closed Saturday morning with the report of the resolutions committee and the election of officers.

New Officers

Sylvanus B. Marston, Pasadena, was elected State president. Other officers are: Gwynn Officer, Berkeley, State vice-president and president of the Northern Section; Wayne S. Hertzka, San Francisco, State secretary; Robert H. Orr, Los Angeles, State treasurer; Winsor Soule, Santa Barbara, secretary of the Southern Section; and Otto Hintermann, San Francisco, treasurer of the Northern Section.

The following were elected to the Board of Supervisors: Harold H. Weeks, William G. Merchant, Frederick H. Reimers, and Ernest Weihe of San Francisco; George D. Riddle, Long Beach; Merrill W. Baird, Glendale; Harry J. Devine, Sacramento; Louis N. Crawford, Santa Maria; and Abe Edelman and Harold C. Chambers of Los Angeles.

Albert J. Evers, regional director of the American Institute of Architects, was named honorary director.

Shipments of deep well water systems amounted to \$193,535 for August, 1938, as compared to shipments totaling \$182,567 for the July, 1938, the Bureau of Census reports.

33— WATER WORKS

BIDS REJECTED
SANTA ANA, Orange Co., Calif.—All bids for protection work on the Santa Ana river were rejected by the Orange county supervisors and the Chief Engineer of the Flood Control Dept., M. N. Thompson, authorized to do the work by day labor. The decision to do the work in this manner followed a discussion the gist of which was that the supervisors feared litigation if awards were made and consequent delay in the work which is badly needed. By units, the United Concrete Pipe Corp. bid was lowest on Sections 1, 2 and 5; Basich Bros. were low on Sections 3 and 4; and Famularn & Landreth were low on Section 6. The lowest combination of bids totaled \$144,000 but United Concrete Pipe Corp.'s stipulation "all or none", made an award on that basis impossible. The flood control engineer has prepared an estimate of the cost of the complete work, \$157,200, which the majority of the members of the board thought compared favorably with the lowest bids on which the contracts could be legally awarded. 33

E. J. FREETHY LOW BIDDER ON EAST BAY JOB

Seven Firms Submit Proposals
On El Cerrito Shop,
Gymnasium

Elmer J. Freethy, 224 Sixteenth street, Richmond, at \$175,550, yesterday submitted the low bid to the Richmond Union High School District for construction of a new shop building and a gymnasium building for El Cerrito High School. Plans and specifications for the two structures were prepared by the architectural firm of Dragon & Schmidts of Oakland.

Seven Proposals

Bids submitted by seven firms on the project were taken under advisement by the school district. The second lowest proposal was submitted by Central California Construction Co., followed by H. J. Christensen Co., and W. E. Lyons Construction Co., Alameda, at \$179,621.

Bids were submitted on the contract for general construction of the shop building and gymnasium, and on three alternates.

The alternates, all deductions, follow: omit one bank shower in girls' shower room; omit cement floors and wainscoting in boys' shower room; and substitution of one by six roof sheathing in lieu of three by four plywood.

Complete Bids

The following submitted bids:

Elmer J. Freethy.....	\$175,550
Central California Const.	
Company	176,883
H. J. Christensen & W. E.	
Lyons Const. Co.	179,621
K. E. Parker Co.	179,975
E. T. Leiter Sons.....	182,837
Lloyd O'Brien	184,880
F. C. Stolte Co.	189,400

The contract calls for construction of a shop building and boys' and girls' gymnasium building with locker rooms, shower rooms and miscellaneous offices.

The proposed structures will be erected adjacent to existing buildings at the southeast corner of Eureka avenue and the Key System Route right-of-way in El Cerrito.

BIDS CLOSE ON FLOOD REPAIRS

SACRAMENTO, Nov. 1.—E. T. Lesure, 87 Ross Circle, Oakland, today submitted a low bid of \$22,596 to the State Division of Architecture for completing flood damage repairs on the banks of the Coyote River at Agnew state hospital farm in Santa Clara Co.

Williams Bros. & Haas, Inc., San Francisco, was low bidder at \$22,977 on an alternate proposal, and a close second bidder at \$22,998 on the basic proposal. Lesure was second low bidder on the alternate, with a figure of \$24,420. Six contractors submitted bids on the contract.

FOURTEEN-MILE S. P. RELOCATION CONTRACTS LET

WASHINGTON, D. C., Nov. 3.—Granfield-Farrar & Carlin, San Francisco, and West Construction Co., Monrovia, today were awarded contracts by the U. S. Bureau of Reclamation for construction of a 14-mile section of the Southern Pacific Railway relocation around the site of Shasta Dam.

Granfield-Farrar & Carlin, at \$812,380, were awarded a contract covering schedules one through four, while West Construction Co., at \$904,981, received the contract under schedule five.

The first four schedules involve construction of earthwork and structures; schedule five calls for construction of earthwork, tunnels and structures.

Two half-mile tunnels at Bass Hill summit are involved.

BIDS NOV. 23-25 ON FOUR STATE HIGHWAY JOBS

Bakersfield Overhead Crossing,
Tulare Grading Out
For Proposals

SACRAMENTO, Nov. 1.—Four contracts for highway and grade separation construction were authorized for advertising here today by the State Highway Commission. Bids on two of the contracts will be opened November 23 in Sacramento and on the remaining two in Los Angeles November 25.

Work on which bids were asked today includes construction of an overhead crossing, repair of another overpass and two grading and surfacing jobs.

The projects are located as follows:

Tulare county: grading and surfacing with plant-mixed surfacing on about two and seven-tenths miles between Exeter and Venida Substation. Bids will be opened in Sacramento November 23.

Bakersfield Overpass

Kern county: construction of an overhead crossing over the Atchison, Topeka & Santa Fe tracks at Oak street in Bakersfield, consisting of one 88-foot, one 80-foot, one 68-foot, and seventeen 45-foot steel girder spans with reinforced concrete decks supported on concrete bents on timber piles. Bids open November 23 in Sacramento.

Ventura county: grading and surfacing with plant-mixed surfacing about three-tenths of a mile. The project is located about two miles west of the Los Angeles county line. Bids will be opened November 25 in Los Angeles.

Orange county: repair of an overpass near Galivan. Bids open in Los Angeles November 25.

Production of steel railway specialties during the first 8 months of 1938 amounted to 56,116 short tons, as compared to production of 349,412 short tons during the same period in 1937, the Bureau of Census reports.
